preface

I'm not good at English If you find that I spell some wrong words, tell me. This program just a toy for me.

I hate write since I was in primary school. I was asked to write thousands of word every day which is the fundamental read that make me hate stury. This program is a revenge!!!

May no more handwriting in this world.

How to Use It

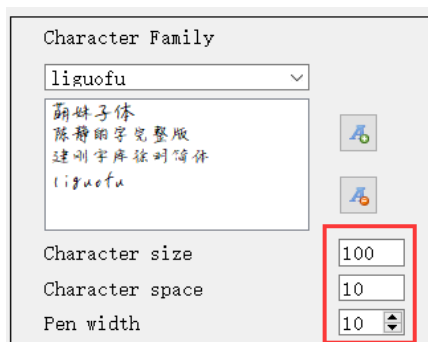

If you don't know how to use it, there is an instruction.

1. select some font and add. I recommend you to select hand write font. The more font the better.

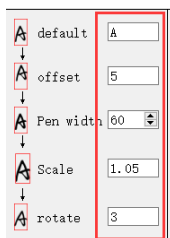

If you don't have had write font, you can google and download some and I have already download some for you in handWriteFont folder. Get font and install.

2. Input characters' original property. If you don't understand those property see "porperty". I additional , pen width is an useless preperty, bu you can also try to change it.

3. Input random argument.

4. Input page property.
